About Me

Completed the Duke of Edinburgh Silver & Bronze Awards in 2014 & 2013 respectively.

Trained in Emergency First Aid by St John's Ambulance.

Competed in football teams for over ten years for both local teams and at university.

I held the role as captain for two seasons and gained an FA Level 1 Coaching Award.

My Objective

I am a second year computing student that is hoping to gain further experience in the web design industry to further my education. Learning whilst on the job would expand my knowledge of the work required and processes that businesses within the industry use from day-to-day.

I am a confident, self-motivated web designer who is keen to work within a team of other talented, creative and passionate colleagues. I have excellent written and verbal communication skills whilst also being a systematical problem solver who enjoys challenges and works well under pressure.
